

Each year Kheops searches the globe to bring you meaningful gifts and spiritual tools that touch the heart and soul. These travels not only help us acquire unique and exotic products, they allow us to lend our support to local villages and communities; where it is our goal to improve sustainability and people's lives.

We lend our support by:

- Planting trees to help reduce our carbon footprint. We've planted 1000 in Bali and 3500 in Canada.
- Donating money to our agent in Bali so he could build a temple for his employees.
- Fundraising for the "Got Lunch" program which feeds local children.
- Hosting virtual food drives to support the NYC Food Bank and victims of Hurricane Sandy.
- Donating fresh vegetable, from our gardens, to the local food pantry.
- Volunteering in many fundraisers in our local community for the Arts Center Building.
- Sourcing out companies that support sustainability.
- Offering all our employees free, healthy, organic meals daily.
- Supporting food banks in Vancouver, Montreal and Toronto.

In 2013 Kheops will extend its fundraising goals by instituting a new charity page on our website. Each month or so, we will feature a new fundraiser to help those in need.

Tree planting in Bali

Making of stone statues

Kid learning agriculture

Harvesting the gardens

Fund Raising for local Center For The Arts
